LAYOUT OVERVIEW

- Report results are typically displayed in an interactive HTML on screen style.
- Based on your selections, if any, the report will only display results that match your initial filtering choices.
- Reports on screen may combine the Level Number result with the Description for that level in one single column. (Report results exported to XLS will break these out, see the [Export XLS directions](#) below.)
- If there is an error in your request or no results can be produced, you get a return message showing the parameters you chose that produced these results. (See the [Error Results section](#) below for more information or to troubleshoot.)

- Use the “Page Down” Link at the bottom left to see additional pages (if any).
- Use the “Bottom” Link to skip to the last page of Applied Parameters where you can review what your filtering choices were on the initial Prompt Page selections. Use the “Top” Link then to return to your first page.
