

Getting started with the Concur app

Registration using Single Sign-On

Clients can use Single Sign-on for mobile login. By using SSO, users can log in to the mobile device using their regular, EUID login and password instead of having a separate one for the mobile device.

Instead of the login and mobile-only password (PIN), the Mobile Registration page provides a company code that users must enter on the Company Sign In screen on the mobile device (see below).

Sign-in for mobile devices

- 1 Open the Concur app. Tap **SSO Company Code Sign In**.
- 2 Enter **SSO Company Code "JJRPN"**. Tap **Next**.
- 3 On **Company Sign On** screen, enter your UNT System EUID and password. Tap **Sign In**.
**Use the same login credentials you use for your MyUNT portal.*
