Sightlines Strategic Capital Planning

June 3, 2021

Service Overview

Gordian has developed a series of tools that will assist your campuses in defining a multi-year investment plan instead of simply picking projects. The **Sightlines Strategic Capital Planning** solution brings the concepts of financial investment and portfolio-based wealth management to the facilities world, treating each building and grounds feature as an investment-worthy asset rather than a financial liability. This strategic focus allows campus decision-makers to target investments that reflect the institution's mission and ensure each dollar is allocated to the highest priority.

Unlike traditional facilities assessments that lead to disjointed project selection, our process builds transparency and constituency on campus by engaging all levels of the organization from the boiler room to the board room. A focus on defined outcomes and total campus engagement builds confidence in the process and the anticipated results.

Gordian's **Sightlines Strategic Capital Planning** solution optimizes your resources by integrating the facilities organization, institutional mission and the finance office. To this end, there is a focus on flexibility in both the process and the tools to ensure the development of an actionable plan:

- **Step 1 — Data Migration and Historic Project Analysis.** The first priority will be to migrate the existing assessment data onto the Gordian Cloud system. This will be followed-up with an analysis of project work completed between the assessment completion and today to create alignment between investments made and needs remaining.
- **Step 2 — Integrate Operational Perspectives.** We harness the latent knowledge that exists on campus, by conducting interviews with facilities managers, institutional leaders and other key stakeholders to validate that cost and life cycle estimations are consistent with operational insight. This step helps us refine data surrounding necessary repairs, priority and timeframe, resulting in a more accurate list of facilities' needs. Additionally, this step creates a sense of ownership with those ultimately responsible for the work and leads to an outcome with buy-in at every level of the institution.
- **Step 3 — Update Strategic Toolkit.** We will use your institution's goals and objectives to strategically segment your buildings into a portfolio of assets with similar functions or priorities. Not all buildings are created equal, and our Building Portfolios process allows us to define areas of emphasis and provides a rationale for facilities funding distribution. This segmentation, combined with updates to additional strategic tools like Project Categories, Investment Criteria, and Project Scoring will result in a fully-prioritized list of facilities needs
- **Step 4 — Develop Multi-year Capital Planning Scenarios.** With portfolios in place, Gordian supports resource allocation discussions and the creation of a capital investment plan. By adding an understanding of historical spending profiles, we can create outcome-based strategies that balance asset preservation with program adaptation in various funding environments.

- **Step 5 — Gordian Cloud Access and Support.** After the assessment data has been migrated, users will be given access to an ever-improving ecosystem where they will have the immediate ability to access key details on projects, run reports and access charts and graphs. Gordian will provide support and training as users become comfortable with the online system.

Capital planning should not be a one-time exercise. Our solution is designed to integrate with your current planning systems: first by maintaining a live database so you can engage senior leadership as campus activity demands, and then by tracking performance to targets, which builds credibility for future appropriations.

Process

Step 1: Data Migration and Historic Project Analysis

Migration of Legacy Project List

Initially, the migration of the existing dataset will take it from third party codifications into industry-standard Unifomat II codifications. This process will connect the existing data, both lifecycles and costs, to RSMeans data from Gordian, the industry leading construction cost data while maintaining continuity in the pricing and timeframes identified in the analysis. Highly valuable strategy tools such as building portfolios, project scoring and investment criteria will also be migrated online and will be updated in Step 3 outlined below. Lastly, any existing notes and unique modifications will also be migrated to ensure no loss of information.

Step 2: Integrate Operational Perspectives

To harness the vast amount of latent knowledge held by your supervision and trades staff, Gordian will conduct interviews with facilities managers and other knowledgeable individuals. We find these interviews invaluable to:

- Confirm and adjust assumptions made in the project list
- Confirm building and system alignment with operational objectives and direction.
- Validate life cycle and pricing estimates.
- Build operator confidence in the process, project recommendations and overall findings.

Supervisor interviews are an iterative process requiring equal involvement of the institution and Gordian staff. The time commitment required of institutional staff can vary, ranging from a few hours to a couple days. Because this stage runs through Gordian Cloud, these interviews can happen on-campus or remotely through a web-meeting.

Step 3: Update Strategic Toolkit

Successful long-term planning requires more than a technical baseline. Gordian uses an array of strategic concepts as tools to tie facilities projects to the mission of the institution and to define a framework for reinvestment funding. The primary strategic and functional prioritization tools are outlined below and will be updated based on the baseline set in the existing project list. Others may be added as necessary to ensure the plan's relevance to the institutional mission and vision.

Building Portfolios

Organizing buildings into a portfolio of assets provides the means to reflect institutional priorities and aspirations. The Building Portfolio structures are often strategic, functional, programmatic, geographic or a locally appropriate combination of these attributes which best highlight areas of emphasis or funding distribution at the Institution. This structure accelerates focus onto sequencing of future investments. Leadership can then target investments toward one portfolio over another or across portfolios as appropriate to best reflect institutional goals and objectives. Projects can now happen in a transparently predictable fashion.

Project Category

The classification of a project helps to differentiate between a “want” versus a “need.” Gordian uses “Repair & Maintenance” where replacement is done in-kind and at end of life; an example would be replacing a roof when it begins to leak. “Modernization” is used to describe an improvement or an addition; common examples of modernization work would be the addition of an elevator in a building or the upgrade from a two-pipe heating system to a four-pipe heating and cooling system. “New Construction” needs are also clarified using Project Category to indicate that they too serve a different purpose than Repair & Maintenance or Modernization because they lead to additional square footage on campus.

Project Package

After codifying each project to a building or architectural system, Gordian assigns each project to a broader project package. Planning at a higher level, project integration (e.g. window replacements and brick pointing together) creates efficiencies among previously isolated projects. Typical packages are Building Envelope, Building System, Infrastructure, Space Renewal and Safety/Code.

Timeframe

Our experiences have taught us that the sequencing of work is essential to aligning financing to successful project execution. Multi-year investment time frames (immediate investment needs, within three years, 4-7 years, 8-10 years, etc.) establish useful investment horizons based on age, condition and can be clearly communicated to leadership and decision makers without locking-in to individual project years.

Investment Criteria

Additionally, Gordian uses Investment Criteria to help decision-makers understand the importance or impact of a project. Each project is assigned to one of five Investment Criteria:

- **Reliability:** Issues of imminent failure or compromise to the system that may result in interruption to program or use of space.
- **Asset Preservation:** Projects that preserve or enhance the integrity of building systems, building structure or campus infrastructure.
- **Safety/Code:** Code compliance issues and institutional safety priorities or items that are not in conformance with current codes, even though the system is “grandfathered in” and exempt from current code.
- **Program Improvement:** Projects that improve the functionality of space, primarily driven by academic, student life and athletic programs or departments. These projects also address campus impact and image needs.
- **Economic Opportunity:** Projects that result in a reduction of annual operating costs or capital savings.

Project Scoring

Gordian will work with the institution to assign a custom scoring methodology to rank projects. Creating an effective array of project scoring factors will increase both the transparency and effectiveness in the project selection process.

Each project receives a score based on the overall need of the building, the importance of investment criteria and timeframe. Scores are customized to fit the specific needs of the institution. For example, at an institution that wishes to stress fire protection and ADA compliance, Safety/Code projects can be given a higher score relative to others. A sample scoring scheme is shown below.

Timeframe Score

Total Project Score:
 Maximum Score = 125 High Urgency
 Minimum Score = 0 Low Urgency

In this example, projects will be considered more urgent if they address imminent issues within critical systems in high-need buildings. Gordian will work with leadership to help guide toward the most effective and impactful set of project scoring factors. Our process includes tools that breaks ties for mid-range priorities.

Step 4: Develop a Multi-Year Capital Plan

The goal of the facility planning process is defining a plan that is credible, affordable, and actionable. To accomplish this, Gordian engages campus leadership in an exercise that explores how the backlog came to exist, ties needs to mission and investment drivers, and develops multi-year funding plans based on mission-driven outcomes for specific groups of buildings. Successful facilities plans deliver a capital program that will manage the rate of backlog accumulation, guide future investment decisions and ensure the effective use of gains made by capital infusions.

Background

As institutional budgets continue to be strained, leaders are faced with difficult decisions. It's not reasonable, or even fiscally responsible, to reduce the institutional backlog to zero, so the key is to define the backlog threshold that effectively manages facility risk. Gordian is not only able to communicate the size of the need, but we will explain how this need came to exist. An analysis of historical annual stewardship, capital investment and maintenance deferral will help outline where the institution has been to assure forward strategy will not repeat previous actions.

Frame the Outcome

The Sightlines Strategic Capital Planning service on Gordian Cloud gives UCF the tools to control their own data and strategic toolkit to maximize the impact of the service. Gordian professionals will assist in guiding the on-campus team as they work to turn their data into action.

Project Deliverables

Gordian deliverables are designed to effectively communicate findings to build broad support in the campus community and integrate with existing campus management systems. The results of the study are segmented between communication and physical deliverables.

Communication: Gordian will conduct three (3) on-site or remote presentations for the Sightlines Strategic Capital Planning process:

- The first presentation will serve to review the updated data and prioritization tools to ensure their accuracy
- The second presentation will serve review planning and funding scenarios.
- The third presentation will be a review of the completed strategic capital plan and can be given to senior institutional leadership (e.g. CFO, President, Cabinet, Board of Trustees) or the appropriate audience at your institution. This presentation will:
 - *Provide context of historical funding levels and detail how the backlog came to exist.*
 - *Give a summary level overview of facilities needs highlighting key strategic issues.*
 - *Summarize Gordian's recommendation for a facilities reinvestment plan that ties to mission and available funding.*

Virtual Deliverables:

- Ongoing web-based access to inventory of projects/assets and all associated information: timeframe, cost, Unifomat code, investment criteria, etc.
- Web-based access to dashboards containing visual summaries of the inventory by building, Unifomat level and portfolio.
- Training for client-team on how to access and use web-based portal as well as ongoing support from the Gordian-team.

Physical Deliverables:

- A ten-year project plan by investment criteria that ties to mission, operations and finance.
- PDF copies of all presentations delivered by team throughout the timeline of the engagement.

Project Schedule

Given the desire of the University of North Texas (UNT) System to present the assessment findings and strategic capital plan to the Board of Regents in August 2021, Gordian will strive to complete the data migration and strategy development by July 9, 2021. This completion date assumes a project kickoff beginning the week of June 7, 2021.

Scope of Work Details

The scope of work for the University of North Texas (UNT) System is shown below. This work will be performed for the UNT System buildings and the UNT Dallas buildings previously assessed by VFA (now a Gordian company). The costs associated with the scope of work are shown in the Professional Fees section of this document.

- Migrate the VFA data to the Gordian software platform
- Analyze the data to discover where project gaps may exist
- Conduct interviews with UNT System and UNT Dallas personnel to:
 - Validate life cycle and pricing estimates
 - Discuss / resolve project gaps
 - Confirm building and system alignment with operational objectives and direction
 - Add capital needs to address modernization
 - Add capital needs to address possible infrastructure deficiencies
- Facilitate discussions with leadership to develop strategy and the resulting capital plan
 - Organize buildings into portfolios
 - Determine scoring methodology for all projects
 - Establish investment priorities
- Present the findings and the strategic capital plan to the UNT leadership / Board of Regents

- 11.5 Upon expiration or earlier termination of this Agreement, the license granted hereunder will also terminate, and Licensee must cease using and destroy all copies of the Proprietary Information. No expiration or termination will affect Licensee's obligation to pay all Membership Fees that may have become due before such expiration or termination, or entitle Licensee to any refund, in each case except as set forth in Section 12 (Limited Warranties, Exclusive Remedy, and Warranty Disclaimer).

12. **LIMITED WARRANTIES, EXCLUSIVE REMEDY, AND WARRANTY DISCLAIMER.**

- 12.1 Solely with respect to Software for which Licensors receives a Membership Fee, Licensors warrants that for 90 from the date of invoice (the "Warranty Period"):

 - (B) modifies or damages the Software, or the media on which it is provided, including abnormal physical or electrical stress; or
 - (C) misuses the Software, including any use of the Software other than as specified in the Documentation or expressly authorized by Licensors in writing.
- 12.3 Licensee's sole and exclusive remedy for breach of the above warranty is that Licensors will, if it receives written notice of such breach during the Warranty Period, at its sole option, either (a) correct or cure any reproducible defect in the Software in breach of such warranty within a reasonable time by issuing corrected instructions, a restriction, or a bypass, or (b) refund the price paid by Licensee for the Software. In the event Licensors furnishes a correction or cure pursuant to clause (a), Licensors will warrant such correction or cure for the remainder of the original Warranty Period or 60 days, whichever is longer. Outside the United States, these remedies are not available without proof that Licensee acquired this copy of the Software from an authorized source.

- 16.10 If any term or provision of this Agreement is invalid, illegal, or unenforceable in any jurisdiction, such invalidity, illegality, or unenforceability will not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction.

In the event of a conflict between the Agreement and this Addendum to Agreement, this Addendum shall govern. Any term or condition of the Agreement that is not superseded by a term or condition of this Addendum shall remain in full force and effect.

Payment. In accordance with Chapter 2251 of the Texas Gov't Code: (a) payment shall be made no later than thirty days following the later of (i) delivery of the goods or completion of the services and (ii) delivery of an invoice to UNTS; and (b) interest, if any, on past due payments shall accrue and be paid at the maximum rate allowed by law. Vendor must be in good standing, not indebted to the State of Texas, and current on all taxes owed to the State of Texas for payment to occur. Tax Exempt. UNTS is exempt from the payment of taxes and will provide documentation confirming its tax exempt status.

Breach of Contract Claims Against UNTS. Chapter 2260 of the Texas Gov't Code establishes a dispute resolution process for contracts involving goods, services, and certain types of projects. No Excess Obligations. In the event this Agreement spans multiple fiscal years, UNTS' continuing performance under this Agreement is contingent upon the appropriation of funds to fulfill the requirements of the contract by the Texas State Legislature. If the Legislature fails to appropriate or allot the necessary funds, or if such appropriation is reduced by the veto of the Governor or by any means provided in the appropriations act, UNTS shall issue written notice to Vendor that UNTS may terminate the Agreement without further duty or obligation.

Travel Expenses. Reasonable travel, meals, and lodging expenses shall be charged in accordance with and shall not exceed State of Texas travel, meal, and lodging reimbursement guidelines applicable to employees of the State of Texas.

If requested, Vendor shall make public information available to UNTS in an electronic format. The requirements of Subchapter J, Chapter 552, Texas Government Code, may apply to this contract and Vendor agrees that the contract can be terminated if Vendor knowingly or intentionally fails to comply with a requirement of that subchapter. Further, Vendor agrees (1) to preserve contracting information for the duration of the contract and according to UNTS records retention requirements; (2) to promptly provide contracting information to UNTS when requested; and (3) upon completion of the contract to provide, at no cost, all contracting information to UNTS or to preserve all contracting information according to UNTS' records retention requirements.

Required Posting of Contracts on Website. Vendor acknowledges and agrees that UNTS is required by Section 2261.253 of the Texas Gov't Code to post each contract it enters into for the purchase of goods or services from a private vendor on its Internet website, including any terms and conditions otherwise marked confidential and/or proprietary.

Insurance. UNTS, as an agency of the State of Texas, is insured for general liability insurance under a self-insurance program covering its limits of liability. The parties agree that such self-insurance by UNTS shall, without further requirement, satisfy all insurance obligations of UNTS under the Agreement.

Israel Non-Boycott Verification. If the Agreement is subject to Texas Gov't Code Section 2271.002, Vendor hereby represents, verifies, and warrants that it does not boycott Israel and will not boycott Israel during the term of the Agreement.
